- Market Risk – Due to market volatility.
- Political Risk and Sovereign Risk

For more information on investment risks and features refer to the Fund's Articles of Association following the link [here](#).

Market Commentary

Kuwait's All Share Index closed the month nearly flat at 7,051.92 points in May 2024. The month-end performance of Kuwait's equity markets was positive compared to its GCC counterparts – Saudi Arabia, UAE, and Qatar, where the markets closed the month in the red. Kuwait's CPI inflation reached 3.17% YoY in April 2024 (0.30% MoM), primarily influenced by rising prices in various key consumer groups, including clothing (5.95%), food (5.79%), and furnishing equipment & household maintenance (3.74%). The Central Bank of Kuwait (CBK) reported that the broad money supply (M2) slightly increased to KWD 40.18 billion in April 2024 from KWD 39.89 billion in March 2024. According to the Central Bank of Kuwait, the total assets of local banks increased by about KWD 203 million from KWD 87.63 billion in March 2024 to KWD 87.83 billion in April 2024. Credit facilities increased to KWD 54.87 billion in April 2024 from KWD 54.52 billion in March 2024. Moody's has affirmed Kuwait's credit rating at "A1" with a stable outlook, reflecting Kuwait's macroeconomic and external stability. However, the progress in economic and fiscal diversification away from hydrocarbons is not currently factored into its baseline assumptions, which may reduce Kuwait's exposure to oil price fluctuations and long-term carbon transition.

Moving forward we will continue to monitor market developments, adjusting tactically to navigate short-term fluctuations, while remaining focused on the Fund's long-term, strategic goals.
